

The Early Riser

COURSE UPDATE

With aeration now behind us and our staff starting to return we are looking forward to a great summer of golf.

First we would like to express our thanks to members Dave Gant, Terry Nichol and Dave Vaughn for all their help this winter. The guys put in many hours cleaning up tree debris in addition to helping us with some projects around the shop.

Looking ahead; we are pleased with the turf condition coming out of winter and expect smooth greens and lush grass this spring. We started fertilizing all surfaces a couple weeks ago and will continue to do so moving forward. This past week we over-seeded all tees and high traffic areas so you can expect some green up of damaged areas over the next month.

We have some small course improvements planned for this season, details to come.

Par 3 tees are now open for the season

Rope and stake around the course will be coming off over the next few weeks as the course continues to recover.

We are in the process of detailing all bunkers and should have them all back in shape by the end of April. As of right now we are still going with no bunker rakes so please enter bunkers from the low side to avoid ruining the faces.

*New hires Tyler Schmitt (left) and Emily Rogers (right)
Please stop and say hi if you meet them out there.*

COURSE CARE

Ball Marks

Please fix your ball marks

Unrepaired ball marks turn into dead spots that take a long time to recover. This affects ball roll trueness and aesthetics.

90 Degree Cart Rule

Please remain on the cart path until as near to your ball as possible before driving on the turf over to your ball. Return directly to the path after hitting your shot.

Bunker Etiquette

Always enter bunkers from the low side, avoid walking on sloped faces unless absolutely necessary to play a shot.

Please tap shoes with a club before walking on green to avoid tracking sand on the putting surface.

Shortcut to #6 Across # 8
